Student Health Services
Be Health Ready:
Few Pointers to Prepare for Campus Life

Keep a copy of the health insurance card or plan with you.

Have a copy of your vaccination records.

Ask your family about past medical history. This includes family medical history.

Complete a Student Health History form. If you are 17 years old and younger, have a parent/guardian to sign it.

If you need medical insurance, ask us for details.

If you have a chronic medical condition, it may be necessary a medical specialist in San Antonio to help manage it.

Frequently Asked Questions

“My child has diabetes. Can they go to Student Health Services for their diabetes care?”
The medical clinic services patients for ambulatory care only. Medical conditions that require specialized care may be addressed with a medical specialist outside of UTSA.

Some medical conditions can be managed by our medical providers. Schedule an appointment and consult with our medical staff.

“Can my child get their allergy shots at the clinic?”
We provide allergy maintenance. Give us a call and discuss with a medical staff member to determine program eligibility.

“Where can I go for medical care when the clinic is closed?”
There are clinics within close proximity to UTSA for urgent care on the weekends and nights (when the clinic is closed). The SHS website has a list of urgent care, medical care, and hospitals, their phone numbers and website.

“Is there a cost for a clinic visit?”
All currently-registered students are eligible to have access to Student Health Services programs and services at no cost. This includes medical visits and access to substance abuse, nutrition, smoking cessation, alcohol risk reduction, reproductive/sexual health programs in Health Education. However, there are charges for immunizations, laboratory work, prescriptions and some procedures.

“Do you take insurance?”
We accept medical insurance through the UT System. The current insurance plan is on the Student Health Services website. If you are covered by a parent/guardian’s private medical insurance, their plan may cover the medications our medical providers prescribe. Speak to a member of our medical team for details.

“What if I have a medical emergency on campus? Who do I contact?”
Call (210) 458-4911 (or 4911 if using the UTSA phone system) wherever you are on campus. The police are first responders to a medical emergency.
Student Health Services
Medical and Preventative Services

Student Health Services provides medical care and wellness programs to currently-registered students. Our professional staff offer personalized quality care you can trust.

Confidentiality
Medical records are maintained in a secure setting and visits are private and confidential. Medical information is protected and is not shared by anyone unless we have your consent.

Student Health Insurance
Medical insurance is available through the UT System. For more information, check the Student Health Services website.

Cost
There is no charge for health care visits for currently registered students. However, some procedures may require a charge. Lab work, immunizations, and pharmacy prescriptions are available for an additional charge.
